

Family Ancestor Chart

This chart was developed to help you get started gathering your family history.

Start with yourself as #01 (or the Person being Honored). Use a second chart if there are two people being honored.

If the #01 person is married, list their spouse on the line marked sp and their children on the lines marked ch.

Then move onto the 2nd Generation listing the father as #02 and the mother as #03 and each of their children on the lines marked ch.

Continue the same way with all 5 generations.

Next, you can use our 'Meet Our Family' forms to fill in all the details for every family. Then you'll have your genealogy data ready to enter and preserve.
